Objective and Investment Policy

By subscribing to AMUNDI ETF DAX UCITS ETF DR, you are investing in a passively managed UCITS whose objective is to replicate as closely as possible the performance of the DAX NET RETURN (the "Index") regardless of whether it experiences a positive or negative development. The expected level of the tracking error under normal market conditions is indicated in the Fund prospectus. The equities included in the composition of the DAX Index are derived from the universe of the most important securities in the German market. This covers the top 40 market capitalisations on the Frankfurt stock exchange. More information on the composition and operating rules of the Index can be found in the prospectus and on www.dax-indices.com. The Index is available via Reuters (.GDAXIN) and Bloomberg (DAXNR). In order to replicate the DAX NET RETURN Index, the Management Company employs "index-based" management using the direct replication method consisting of investing in financial securities that are part of the DAX NET RETURN Index in proportions that are extremely close to those of the Index. Eligible forward financial instruments may be used for hedging and/or exposure purposes. You will have a permanent investment, via the Basket, of at least 75% in securities eligible for the French Equity Savings Plan (PEA, a savings plan reserved for French investors).

** Source : Amundi. The above cover complete periods of 12 months for each calendar year.* ***Past performance is no predictor of current and future results and does not guarantee future yield*** *. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

	1 year	3 years	Inception to date *
Portfolio volatility	15.08%	15.07%	21.42%
Benchmark volatility	15.08%	15.06%	21.43%
Ex-post Tracking Error	0.12%	0.12%	0.16%
Sharpe ratio	0.01	0.78	0.32

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk.
The Tracking Error indicator measures the performance's difference between the fund and the benchmark

Risk Indicator *(Source : Fund Admin)*

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. The use of complex products such as derivatives can lead to increased movement of securities in your portfolio. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI ETF DAX UCITS ETF DR prospectus.

Important information

The Fund presents an unmeasurable risk of capital loss. Past performance in no way serves as either an indication of future results or a guarantee of future returns. For further information about the risks and before making any investment, refer to the Key Investor Information Document (KIID) and the prospectus for each fund, available in French on request or on the website: amundietf.fr The information contained in this document has been obtained from sources believed to be reliable. Amundi cannot, however, ensure that the information is accurate and reserves the right to amend the analyses presented above at any time. This document is of a non-contractual nature and in no way constitutes a recommendation, solicitation of an offer or an offer regarding a purchase, sale or exchange relating to the Fund described herein, and must under no circumstances be interpreted as such. The transparency policy and information on the composition of the funds' assets are available at amundietf.com. The indicative net asset value is published by the stock markets. Fund units purchased on the secondary market cannot generally be resold directly to the Fund. Investors must buy and sell units on a secondary market with the assistance of an intermediary (e.g. a broker) and may, in this case, have to pay charges. In addition, it is possible that investors may pay more than the current net asset value when they buy units and receive less than the current net asset value when they sell. Complete list of brokers and marketmakers available at : amundietf.com Financial intermediary fees apply. Only for SFDR 8 and SFDR 9 products Please note that this passively managed fund replicates an underlying index which methodology aims at providing a broad market exposure without considering ESG factors or exclusions. Therefore, you might be exposed to securities that might be involved in serious controversies, acute sustainability risks or material negative impact on sustainability factors. Please refer to the legal documentation and index methodology for full details. Should you want to consider an ESG alternative, you will find a wide range of options within our responsible investing range.
