Objective and Investment Policy

The Fund is a passively managed UCITS. The Fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Disclosure Regulation. By subscribing to Amundi PEA Asie Emergente (MSCI Emerging Asia) Screened UCITS ETF, you are investing in a passively managed UCITS whose objective is to replicate as accurately as possible the performance of the MSCI EM Asia Screened Select ex Thermal Coal Index (the "Index"), regardless of whether it experiences a positive or negative development. The maximum tracking error objective between the growth of the net asset value of the Fund and that of the Index countervalued in euro is indicated in the Fund's prospectus. The Index, net dividends reinvested (dividends net of tax paid by the shares in the index are included in the index calculation), denominated in US dollars, is calculated and published by the index provider MSCI. The investment universe of the Index is identical to that of its parent index, "MSCI Emerging Markets Asia", which is designed to measure the overall performance of Asia markets classed as emerging by MSCI (the "Investment Universe"). The Benchmark Index includes environmental, social and governance ("ESG") criteria: Exclusion of certain activities based on ESG criteria (determined according to the MSCI ESG Research methodology): tobacco, controversial weapons, civil firearms, Arctic oil and gas, thermal coal reserves and coal-fired thermal electricity generation. In addition, on the basis of ratings and within the limits of the thresholds defined by MSCI, companies identified as involved in ESG controversies or as not in agreement with the UN Global Compact ("UNGC") are excluded from the Index Reduction of carbon intensity: An iterative process is then applied to reduce the intensity of greenhouse gas emissions between the Index and the Parent Index by at least 30%. The non-financial hedging rate represents more than 90% of the securities that comprise the Index. The limits of this approach are described in the Fund's prospectus, citing risk factors such as sustainability risk. The ESG score of companies is calculated by an ESG rating agency based on raw data, models and estimates collected and calculated using proprietary methods. Due to the lack of uniformity and the uniqueness of each methodology, the information provided may be incomplete. You are exposed to currency risk between the currencies of the equities that make up the Index and the currency of the Fund. More information on the composition and operating rules of the Index can be found in the prospectus and on msci.com. In order to synthetically replicate the Index, the UCITS exchanges the performance of the assets held by the Fund for that of the Index by entering into futures contracts or total return swaps (TRS). You will have a permanent investment, via the Basket, of at least 75% in securities eligible for the French Equity Savings Plan (PEA)

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

Lower Risk — Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. The use of complex products such as derivatives can lead to increased movement of securities in your portfolio. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the Amundi PEA Asie Emergente (MSCI Emerging Asia) Screened UCITS ETF prospectus.

Important information

Note on the Fund management company and the fund
French fund ''Fonds Commun de Placement'' authorized by the AMF (Autorité des Marchés Financiers), (the ''UCITS'' or the ''Fund'').
The Fund is described in a Key Information Document (KID), or Key Investor Information Document (KIID) for UK investors, and prospectus. The Funds KID, or KIID for UK investors, must be made available to potential subscribers prior to subscription.
The Funds reference material (KIID, prospectus, annual and semi-annual reports) can be obtained from Amundi on request, or obtained via the amundietf.com website.

In the United Kingdom (the “UK”), this website is being issued by Amundi (UK) Limited, 77 Coleman Street, London EC2R 5BJ, UK. Amundi (UK) Limited is authorised and regulated by the Financial Conduct Authority (“FCA”) and entered on the FCA’s Financial Services Register under number 114503. This may be checked at https://register.fca.org.uk/ and further information of its authorisation is available on request. Each fund and its relevant sub-fund(s) under its respective fund range that is referred to in this website (each, a “Fund”) is a recognised collective investment scheme for the purposes of Section 264 of the Financial Services and Markets Act 2000 (the “FSMA”).
Potential investors in the UK should be aware that none of the protections afforded by the UK regulatory system will apply to an investment in a Fund and that compensation will not be available under the UK Financial Services Compensation Scheme.
Regarding Funds admitted on a regulated market, the listing is subject to a volatility control mechanisms to ensure that the ETF price does not deviate significantly from a reference price set by the listing rules of the relevant regulated market, notably through the implementation of a trading halt mechanism in case of significant deviation from this reference price.
The Fund offers no capital guarantee. Investors may not get back the full amount of their initial investment, particularly in the event that the benchmark index falls. Subscribing to a UCITS may involve risks. Potential investors are advised to read the Funds risk profile, which is described in detail in the prospectus. The amount that is reasonable to invest in the Fund will depend on the personal circumstances of each investor. To determine this amount, investors should take into account their financial situation, personal assets, and current and future requirements, as well as considering their willingness to accept risks or conversely their preference to invest cautiously. Investors are also strongly recommended to sufficiently diversify their investments so as to avoid being exposed solely to the risks of this Fund. Investors should therefore seek advice in this regard from their usual advisors (legal, tax, financial and/or accounting) before purchasing any units of the Fund.
The source of the data contained in this document is Amundi Asset Management unless otherwise stated.

Policy regarding portfolio transparency and warning on secondary market
The policy regarding portfolio transparency and information on the funds assets are available on amundietf.com. Shares purchased on the secondary market cannot usually be sold directly back to the fund. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. Investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them.
