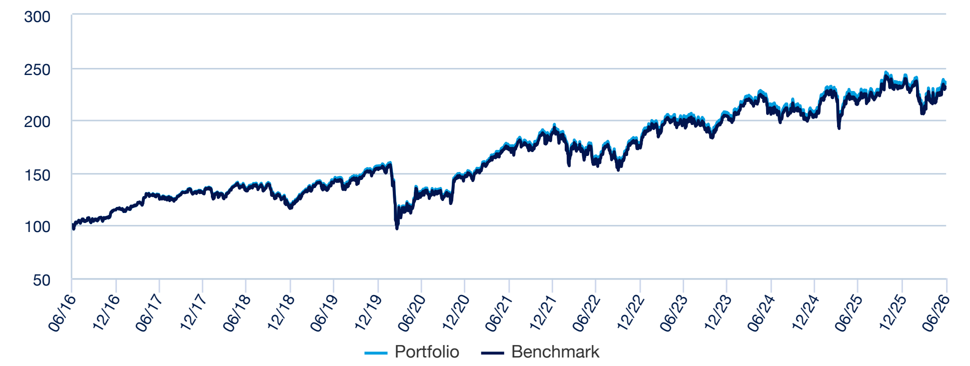
Objective and Investment Policy

By subscribing to Amundi CAC Transition Climat UCITS ETF, you are investing in a passively managed UCITS whose objective is to replicate as closely as possible the performance of the CAC Transition Climat NR Index (the "Index"), regardless of whether it experiences a positive or negative development. The maximum tracking error objective between the growth of the net asset value of the Fund and that of the Index is indicated in the Fund's prospectus. The Index, net dividends reinvested (dividends, net of tax, paid by the equities in the index are included in the index calculation), denominated in euro, is calculated and published by the index provider Euronext. The objective of the Index is to reflect the performance of SBF 120 Index companies (the "Parent Index") that have defined target levels for reducing their greenhouse gas ("GHG") emissions. These levels must be approved in accordance with the objective of limiting the temperature rise to a level of 1.5°C in line with the Paris Climate Agreement and as validated by the Science Based Targets initiative ("SBTi"). The Science Based Targets initiative encourages companies to set GHG reduction targets to limit global temperatures to below 2°C, or even below 1.5°C, above pre-industrial levels, in line with the recommendations of the Intergovernmental Panel on Climate Change (IPCC). The Index's characteristics are as follows: a) An investment universe identical to that of the SBF 120 index, made up of the 120 largest and most liquid companies listed on Euronext Paris. b) Companies subject to high or severe ESG controversy are excluded from this universe, as are those identified as being in violation of the United Nations Global Compact guidelines. c) Within the limits of the thresholds explained in the Index methodology, companies not compatible with a short/medium term temperature reduction trajectory of 1.5°C, according to the SBTi, on the basis of their scope 1 + 2 emissions are excluded. d) Within the limits of the thresholds explained in the Index methodology, companies not aligned with a temperature reduction trajectory of 2°C on the basis of their scope 3 emissions are excluded. If less than 24 securities are excluded after the above filtering, then the remaining companies are ranked in descending order according to their scope 3 temperature score. The companies with the highest score are added to the index until at least 20% of companies in the Parent Index are excluded. e) Securities involved in controversial activities such as controversial weapons, civilian firearms, tobacco production or distribution, thermal coal or unconventional oil and gas exploitation are also not eligible for inclusion in the Index. The limits of this approach are described in the Fund's prospectus, citing risk factors such as sustainability risk. The ESG score of companies is calculated by an ESG rating agency based on raw data, models and estimates collected and calculated using proprietary methods. Due to the lack of uniformity and the uniqueness of each methodology, the information provided may be incomplete. More information on the composition and operating rules of the Index can be found in the prospectus and on euronext.com. The Index is available via Reuters (.CSBTN) and Bloomberg (CACSBT15). Exposure to the Index will be achieved through direct replication, primarily by investing directly in transferable securities and/or other eligible assets representing the components of the Index in a very similar proportion to how they appear in the Index. For investment and/or efficient portfolio management purposes, the Investment Manager may use derivative instruments to manage the entry and exit of capital and derivatives that relate to the Index or its components. In order to generate additional income to offset its costs, the Sub-fund may also enter into securities-lending transactions.

Performances from 30/06/2016 to 30/06/2026 (Source : Fund Admin)



Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility	16.44%	15.23%	20.54%
Benchmark volatility	16.44%	15.24%	20.54%
Ex-post Tracking Error	0.44%	0.28%	0.23%
Sharpe ratio	0.21	0.12	0.30

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

** Source : Amundi. The above cover complete periods of 12 months for each calendar year.* ***Past performance is no predictor of current and future results and does not guarantee future yield*** *. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

Risk Indicator ***(Source : Fund Admin)***

1 2 3 **4** 5 6 7

Lower Risk — Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. The use of complex products such as derivatives can lead to increased movement of securities in your portfolio. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the Amundi CAC Transition Climat UCITS ETF prospectus.

Important information

The Fund presents an unmeasurable risk of capital loss. Past performance in no way serves as either an indication of future results or a guarantee of future returns. For further information about the risks and before making any investment, refer to the Key Investor Information Document (KIID) and the prospectus for each fund, available in French on request or on the website: amundietf.fr The information contained in this document has been obtained from sources believed to be reliable. Amundi cannot, however, ensure that the information is accurate and reserves the right to amend the analyses presented above at any time. This document is of a non-contractual nature and in no way constitutes a recommendation, solicitation of an offer or an offer regarding a purchase, sale or exchange relating to the Fund described herein, and must under no circumstances be interpreted as such. The transparency policy and information on the composition of the funds' assets are available at amundietf.com. The indicative net asset value is published by the stock markets. Fund units purchased on the secondary market cannot generally be resold directly to the Fund. Investors must buy and sell units on a secondary market with the assistance of an intermediary (e.g. a broker) and may, in this case, have to pay charges. In addition, it is possible that investors may pay more than the current net asset value when they buy units and receive less than the current net asset value when they sell. Complete list of brokers and marketmakers available at : amundietf.com Financial intermediary fees apply. Only for SFDR 8 and SFDR 9 products Please note that this passively managed fund replicates an underlying index which methodology aims at providing a broad market exposure without considering ESG factors or exclusions. Therefore, you might be exposed to securities that might be involved in serious controversies, acute sustainability risks or material negative impact on sustainability factors. Please refer to the legal documentation and index methodology for full details. Should you want to consider an ESG alternative, you will find a wide range of options within our responsible investing range.
