## Objective and Investment Policy

This Sub-Fund is passively managed. The objective of this Sub-Fund is to track the performance of MSCI EM ESG Selection P-Series 5% Issuer Capped Index (the "Index"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return. The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating an environmental, social and governance ("ESG") rating. MSCI EM ESG Selection P-Series 5% Issuer Capped Index is an equity index based on the MSCI Emerging Markets Index ("Parent Index"), representative of the large and mid-cap securities of 26 emerging countries and issued by companies that have the highest ESG rating in each sector of the Parent Index. The Index methodology is constructed using a "Best-in-class approach": best ranked companies are selected to construct the Index. "Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class. It excludes companies falling behind on an ESG level, particularly on the basis of ESG ratings. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers). The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics. The limits of the approach adopted are described in the Sub-Fund's prospectus through risk factors such as Sustainable investment risk. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete. Assessment of sustainability risks is complex and may be based on ESG data which is difficult to obtain, incomplete, estimated, out of date and/or otherwise materially inaccurate. Even when identified, there can be no guarantee that these data will be correctly assessed. The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc.). For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus. More information about the composition of the index and its operating rules are available in the prospectus and at: [msci.com](https://msci.com). The Index value is available via Bloomberg (MXEME5NU). The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and also if it allows a better exposition to an Index constituent. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

## Calendar year performance\* (Source: Fund Admin)

|           | 2025   | 2024   | 2023   | 2022    | 2021   |
|-----------|--------|--------|--------|---------|--------|
| Portfolio | 32.65% | 6.24%  | 4.51%  | -21.73% | 0.02%  |
| Benchmark | 32.35% | 6.44%  | 4.85%  | -21.55% | 0.50%  |
| Spread    | 0.30%  | -0.20% | -0.34% | -0.19%  | -0.47% |

\* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

## Risk indicators (Source: Fund Admin)

|                        | 1 year | 3 years | Inception to date * |
|------------------------|--------|---------|---------------------|
| Portfolio volatility * | 17.73% | 15.67%  | 16.85%              |
| Benchmark volatility   | 17.67% | 15.66%  | 16.84%              |
| Ex-post Tracking Error | 0.28%  | 0.34%   | 0.92%               |
| Sharpe ratio           | 0.71   | 0.91    | 0.33                |

\* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

## Risk Indicator (Source : Fund Admin)

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi Index Solutions prospectus.

## Benchmark Sector breakdown (for illustrative purposes only - Source : Amundi)

Parent index : **MSCI EMERGING MARKETS**

**Socially Responsible Investment (SRI)**

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

**Evaluation by ESG criteria (Source: Amundi)**

|                       | Benchmark | Parent index |
|-----------------------|-----------|--------------|
| <b>Overall Rating</b> | 7.68      | 6.74         |
| <b>Environment</b>    | 6.60      | 6.06         |
| <b>Social</b>         | 5.84      | 5.48         |
| <b>Governance</b>     | 5.89      | 5.42         |

Parent index : **MSCI EMERGING MARKETS**

**ESG criteria**

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies.

Environmental, Social, and Governance risks and opportunities are posed by large scale trends (e.g. climate change, resource scarcity, demographic shifts) as well as by the nature of the company's operations.

Scores are on a 0-10 scale, with 10 being the best.

**"E" for Environment** (Climate Change, Natural Resources, Pollution & Waste and Environmental Opportunities)

**"S" for Social** (Human Capital, Product Liability, Stakeholder Opposition and Social Opportunities)

**"G" for Governance** (Corporate Governance and Corporate Behavior)

Source: Raw ESG data for companies are provided by MSCI

**Carbon footprint****Carbon footprint: carbon emissions per euro million invested**

|                                                         | Benchmark | Parent Index |
|---------------------------------------------------------|-----------|--------------|
| Total carbon portfolio footprint (Index/Parent index) : | 99.87     | 164.37       |

Parent index : **MSCI EMERGING MARKETS**

**Carbon footprint**

This indicator measures the portfolio's carbon emissions in metric tonnes of carbon equivalent (tCO<sub>2</sub>e) per euro million invested.

This is an indicator of the emissions generated by investment in this portfolio.

**Definition of scopes :**

- **Scope 1** : all emissions that arise directly from sources that are owned or controlled by the company.

- **Scope 2** : all indirect emissions generated by the purchase or production of electricity, steam or heat.

- **Scope 3** : All other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3 - Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

Source : The carbon emissions data is supplied by Trucost. It corresponds to companies' annual emissions expressed in tCO<sub>2</sub>e, which covers the six greenhouse gases defined in the Kyoto protocol whose emissions are converted into global warming potential (GWP) in CO<sub>2</sub> equivalent.
